The MOBIPAL® distributes pallets in pre-defined distances in the order picking zone

The stacker is motorized. The MOBIPAL® allows a quick and easy storing and destacking of the pallets. Capacity: 15 pallets

The MOBIPAL® is very useful for stacking and storing pallets that are scattered in different places of the warehouse.

With the MOBIPAL® there is no more manual pallet handling: accident risk reduction and improvement of working conditions - an ergonomic solution.

It can also be used as an autonomous pallet stacker if that is not available.

Black matt chassis, yellow RAL 1021 for the frame chassis. Mobile parts yellow RAL 1021. Protection elements lower crankcase galvanized steel thickness 2 mm, upper crankcase colorless polycarbonate thickness 3 mm.
